## **DETAILED ACTION**

### ***Notice to Applicant***

This communication is in response to the communication filed 04/13/2009.

Pending claim(s): 1-15. Amended claim(s): 1-8, 12-15.

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

The specification as originally filed on 10/01/2002 in application 60414995 discloses (page 6):

A block diagram of a method for managing the health care of managed care plan members is shown in Figure 1.

The specification further discloses (page 8):

A further embodiment of the present invention is shown in Figure 2. In this embodiment, data from a managed care plan's member population is used to provide recommendations for improving the health care outcome for the member population, rather than focusing on individual members.

The specification further discloses (page 10):

A still further embodiment of the present invention may be used to manage the health care of specific populations, such as members suffering from a particular disorder or disease.

According to the specification, there are three distinct embodiments of the disclosed invention:

- (I) managing a single member of a general population;
- (II) managing a plurality of members of a general population;
- (III) managing a specific population.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

In particular, these groupings are considered to be species because Applicant does not disclose that these groupings are usable together. Therefore, they are considered to be species.

Applicant is advised that should Applicant refer to later-filed disclosures to support any particular position, Applicant's priority date of 10/01/2002 will be forfeited.

For examination purposes, Examiner relies only on the disclosure filed on 10/01/2002 to preserve Applicant's priority claim.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic species.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or

employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the

prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
